

KPAX reinvents the management of printer and multifunctional copiers

A centralized fleet management solution for multi-brand office printing and copying hardware. From a single interface, you can access MFP device information regardless of the number of sites, the number of customers, or the number of machines. KPAX optimizes the management of your MPS program to reduce the fleet's operating costs, improve service quality and develop new revenue opportunities.

More than
650K
devices managed

Customize your plan based on your needs.

When you apply a profile to one or more devices, then the Koins are consumed and recorded in the current month. The features are activated for a period of 30 days and are automatically renewed without any action on your part. Of course, you can mix several profiles in the same space!

To enable features on a device, create or use default profiles:	
Ignore/unmanaged » profile (default)	0
Managed/mps » profile (meters + consumables + technique)	Ⓚ Ⓚ Ⓚ
Monitor the competition » profile (meters)	Ⓚ
Deliver only consumables » profile (consumables)	Ⓚ
Read only the meters » profile (meters)	Ⓚ

BILLING

- Automatic meter reading and feedback Reduce time spent obtaining information to bill
- Improve the quality of billing data

TECHNICAL MANAGEMENT

- Diagnose before sending a technician
- Send the technician with the right part
- Limit and optimize the technician's movements

CONSUMABLES

- Automate delivery triggering
- Reduce customer cartridge inventories (CPP contracts)
- Limit early cartridge replacement

SALES

- Statistics & customized reports
- Develop sales opportunities
- Identify necessary changes within the fleet
- Detect business opportunities

LIBERTY SIMPLIFIES DATA COLLECTION

Liberty allows you to simplify the implementation and maintenance of agents in poorly adapted client environments. The Liberty stand-alone box reduces the time technicians spend managing collection agents.

KPAx Liberty is installed on the customer's network

Only one Liberty per client network is required, regardless of the number of devices to be managed.

PoE - Power over Ethernet available (Network must support PoE)

- No Power adapter needed
- Data + Power in one cable
- Good for environments that support PoE and don't want to use up an electrical outlet.

Low power supply consumption

Ethernet switch 100Mbit/s

RJ45 connectivity

Integrated WIFI chip

SOFTWARE DATA COLLECTOR

Is installed on a Windows environment (preferably server or user workstation) with connectivity to the printing systems and it runs 24 hours a day, 7 days a week, in a closed session.

WEB ACCESS PORTAL

Liberty allows you to simplify the implementation and maintenance of agents in poorly adapted client environments (no server, no workstation control, low IT competence, Mac environment...).

THIRD-PARTY INTEGRATION

KPAx is the most versatile fleet management solution on the market today. It was created "by design" to integrate with today's popular third-party software applications.

KPAx WIKI

A community database of printers and MFD references linked to our online servers. It Allows us to globally enhance our solution with a better understanding of printer compatibilities.
