

OVERVIEW

Healthcare

Secure patient records to stay compliant & efficient in healthcare

Security and simplicity have been coded into PaperCut solutions for over twenty years (that's got to earn us a Ph.D., right?), so you can focus on the health of your patients, not your printers.

CHALLENGES

The highest priority is the well-being and safety of patients. That extends beyond their physical health to protecting their Personal Health Information (PHI). With prescriptions, charts, wristbands, and referrals floating around, this can be a difficult area to control.

So if a healthcare environment has...

- PHI leaving site without traceability
- The need for interoperability between EMR and printing systems
- Complex printing environments
- Confidential faxing to other clinics, departments or external pharmacies

PaperCut MF is the solution for you.

"The simplicity of setup and implementation, along with the cost and waste savings, easily make this a no-brainer for both small and large organizations"

Chris Peterman - Epic Client Systems Administrator, Southeast Health.

Solutions for Healthcare

Find-Me, PHI & Compliance

Authentication at the device is a critical step in creating simple and secure access to printing records, notes, etc., especially in smaller community health centers with legacy, mixed fleet devices. Secure print release, combined with Find-Me printing looks like: users send print jobs to a single print queue from their computer or device, and swipe their badge at whichever printer they're closest to in order to confirm their identity to release their print job. And if this is one of those times a print is never released, we'll just securely delete it. FindMe solves critical compliance measures for PHI and removes the risk of steep fines.

EMR/ EHR Fax Integrations

Front-end is one thing, but back-end printing out of an EHR application is another. Papercut continues to keep it simple and easy providing full integration into the most popular EHR systems; Epic, Cerner, MediTech to name a few. The key here is to maintain the same convenience, consistency, reliability and security that papercut offers to the Administrators and apply the same ease-of-use out of any EHR system. With authentication, secure faxing also continues to be a leading need. Whether API delivery or generic SMTP, Papercut takes that workflow and delivers a secure and reliable experience, with end points and address book lookups.

Mobile Printing

In both Behavioral and Clinical offices around the Nation, mobile workers with mobile devices provide convenience but require the proper management to make it smooth. Papercut takes any mobile device from your on-the-go physicians, nurses and administrative staff, and allows them to print from any mobile device, no matter the operating system; iPhones, Androids, Chromebooks or Macbook Airs to name a few. Worried about security? Your print job goes into a secured hold queue and will be waiting for you to be released once you get back to the office or find yourself in front of your device. Mobility Print provides the convenience and ease of mobile friendly printing as more and more facilities adopt a digitalfirst mindset.

Print Driver Deployment

Adding new printing is tedious, no matter how you slice it. Print Deploy automates the time consuming, frustrating tasks of setting up print queues and deploying print drivers. It's perfect if you have multiple locations (e.g. clinics, campuses, partners) with few IT resources on site, have doctors and nurses moving between locations, needing access to printers on demand, or have a mixed computer environment and want an easy way to enable printing on all of them (no matter the operating system or end-user permission level). Print Deploy makes our "Clone-Configure-Deploy-Enjoy" approach easy.

Solutions for Healthcare

Healthcare Examples

- Emergency Rooms
- Intensive Care Units
- Urgent Care Locations
- Community Health Centers
- Dentist Offices
- Laboratory Facilities
- Primary Care Clinics
- Behavioral Health Facilities
- Mental Health Specialists: Psychologist, Psychiatrist, Counseling Services, Therapy Services, Rehabilitation Services,
- Physical Therapy Clinics
- Substance Abuse Programs
- Nursing Homes
- Assisted Living Programs

Additional Features

Authentication

Peace of mind knowing the right individual picks up print jobs with multiple authentication methods for users and document security.

Dashboard Management

Access all the information needed about the print environment on the web-based admin dashboard.

Vendor Neutral

PaperCut supports all setups, sizes, and mixed environments like mac/windows to facilitate change and flexibility.

Find-Me

Users can securely print their jobs at any enabled MFP with authentication, which also helps eliminate the need for Staff to worry about what printer to print to; just use the find me queue.

HIPAA Compliance

Keep personal information personal with the secure print release feature of PaperCut.

Rules-Based Printing

Redirect print jobs to more cost-efficient devices.

Quotas

Choose an allotment of balance to give to staff and departments. It gives the ability to show awareness and accountability.

Support

Installation, implementation, configuration, training, and support all delivered by ACDI's award-winning team of experts.

Print Policies

Curb the printing environment by managing users based on supported behaviors, i.e., B/W, Duplex, per application, Etc.
