

Print Queue Deployment Made Simple

Automatically deliver the right printer queues to the right users

Say goodbye to manual installs and help desk tickets. With PaperCut Hive's Print Queue Deployment, users always have the right printers – no matter where they are.

What it Does

Print Queue Deployment makes printer setup effortless. Whether you need direct print queues or Find-Me printing, queues can be deployed automatically from the cloud, based on a user's email, their network, or the device they're using.

Why It Matters

- **Reduce IT headaches** – Eliminate repetitive driver installs and troubleshooting.
- **Boost productivity** – Users can print instantly with no delays.
- **Hybrid & remote ready** – Works seamlessly across offices, home networks, and mobile setups.
- **Futureproof** – Scales easily as your business grows, no print server required.

Core Capabilities

- **Bulk Deployment** – Roll out multiple queues at once with CSV import.
- **Dynamic Updates** – Remap or reassign queues without touching user devices.
- **Printer Discovery & Control** – Manage which printers are visible and available.
- **Flexible Delivery** – Supports multiple protocols and different network types.
- **Behind-the-Scenes Automation** – A lightweight client ensures updates happen quietly and reliably.

Who Benefits Most

Print Queue Deployment is ideal for:

- Organizations with multiple sites or hybrid work environments.
- IT teams looking to reduce administrative overhead.
- Companies transitioning to cloud-based IT (Entra ID, Google Workspace).
- Businesses tired of manual queue management or print server headaches.

Key Benefits at a Glance

- Cloud-based, no servers required
- Deploy unlimited queues per licensed printer
- Easy to scale across fleets of any size
- Supports both Find-Me printing and Direct print queues
- Improves user experience and IT efficiency

FAQs

Q: What happens if my WAN is down?

A: Printing continues via local fallback options.

Q: Can I reassign queues when I replace a printer?

A: Yes, queues can be remapped instantly with no reinstall.

Q: Do I need a print server?

A: No, Hive is a cloud application that leverages the local clients to support printing. No print server needed.

Ready to Simplify Printing?

With PaperCut Hive Print Queue Deployment, deploying printers is no longer a burden—it's automatic, cloud-powered, and built for the way people work today.
